

SeS - Sustainable eSchool **Construction of the Civil society for the Youth**

Home to Internet-Based, Future-Oriented Dialogue, dealing with questions of morals and faith issues of human dignity, conflict resolution and tolerance in the present.

Preamble

The Internet, which permits direct access to information and the formation of unlimited relationships between people, makes possible a new learning environment; a democratic environment in which everyone's voice can be heard. The International e-School has harnessed the technology for education for human values, in ways that offer the students choices, involvement and active engagement.

Guiding Principles

e-School offers future-oriented programs, centered on human, ethical & practical questions rising from current issues. The participants are involved in:

- Interdisciplinary learning combining historical, social, psychological and artistic aspects
- A multicultural dialogue, with listening to and acceptance of the "other", governed by the rules of Netiquette
- The formulation of personal and community identity
- Examining the significance of communal and national affiliation
- Personal and group research using online databases

Methods

- Build a network of organisations and key persons who will work together to establish an international educational network and to assemble an educational "Tool Box" for all member of the network
- Train teachers and educators to use the network and the educational tools created
- Discover & Train young leadership
- Create a data base that will consist of:
 - Best practices
 - Existing tool boxes from previous projects as stated below
 - Case studies
 - Materials developed in each exchange project
- Establishment of youth research groups in all participating countries
- International Presentations of projects and products of the participants in the program.
- Work with the ministries of education and local authorities in participating countries in order to integrate the program into schools curriculum, so that it's contents will be taught through existing lessons of English, History, sociology, Computer classes etc.

Technology

Web platform supporting the network of organizations along with number of applications such as google earth, blogs, interfaces with cellular and various other open source applications

Existing (and in development) Programmes

- The [All-in-peace movement](#) that revived the ancient Olympic truce ("Ekecheiria") as a means for sustainable inner peace – for Children from all over the world, but focusing on children from conflict areas
- The "Internatinal Book-Sharing Project" run by the Janusz Korczak International School in the Ghetto Fighters' House Museum
- Relationet (www.relationet.net)
- eDialogue for English Teachers
- Michael's Dialogue in Cooperation with ' Sacred Parks'

SeS - Sustainable eSchool Construction of the Civil society for the Youth

Eyal Bloch after twenty years of teaching experience, from kindergarten to university level, acts as a social and educational entrepreneur. He has created and developed educational models for coexistence and cooperation, which are duplicated and awarded throughout the world. He has founded and coordinated the "AllinPeace" movement, which organizes "Peace Olympics" for children from devastated and conflicts areas. "AllinPeace" was awarded in 2004 "one of the best peace education through sport and art programs" on the International Day of Peace at the United Nations. In 2002, Eyal initiated a four-year program for David Yellin College and the Social Department of Jerusalem Municipality, for developing community-leadership and initiating educational and social projects, intended for students who are motivated towards taking social actions in their communities. This program was the base for new institute Education for Sustainability at the David Yellin Academic College of education, Eyal serves as a Cofounder and co-director of the institute.

Philippe Scheimann, MSc & MBA, CEO of Ayala Alternative Organizational Consulting, Chief Technologist at POLITECH Institute and VP Product Management at Limood Social Knowledge (start-up). He is a Management Technologist and Internet Veteran. He has vast experience in management consulting, in creating and launching virtual communities for collaboration and conflict resolution for international projects with NGOs as well as in the business sector. He is well acquainted with the ICT market, Knowledge Management and has published numerous scientific articles on the use of ICT in organizations.
